GRS Thermoplastic polyurethane (TPU)-100%

Thermoplastic polyurethane (TPU) is made of MDI containing NCO functional group and POLYOL, 1.4BG containing OH functional group, by extrusion and blending. The products cover the range of industrial applications and necessities of the people. Currently, TPU can be used as a substitute for PVC wherever it is used.

Also TPU can do a variety of colors, semi-transparent single mist frosted, high purity, fine and smooth without fading.

Biodegradable and compostable materials

C&T biodegradable products are made from a blend of PLA (polylactic acid), PBAT and plant fibers that can be completely decomposed into water and carbon dioxide under industrial composting conditions and tested to meet standard ISO 14855-1-2012, which guarantees their full compostability in industrial composting plants.

Customized biodegradable products can be marked with the biodegradable certification mark of the raw material on the outer packaging of the product, proving the environmentally friendly and harmless advantages of the raw material.
