The global retail market size reached \$27.34 trillion in 2022,
Under the global trend of consumer grading, "cost-effectiveness" is highly favored
The new retail track of practicality and fashion is growing rapidly.

The gross profit premium of new retail products mainly comes from:
Pricing power for IP, customized products, and free brand confirm price by themselves.
IP plays a significant role in boosting sales growth in the new retail industry,
Not only does it increase product sales by 20-50%, but it also enhances brand awareness
