# We turn designs into profitable products at scale

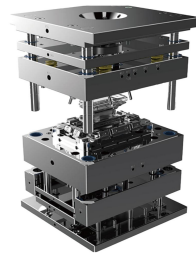

## Design-to-Manufacturing Integration

→ Ensure concepts translate seamlessly into production

## Stable Quality Control System

→ Ensure consistent quality across every batch

±0.01mm Accuracy  
= High Quality

## Third-Party Testing Organizations:

# 01

## **Trusted by Brands Powered by Manufacturing Excellence**

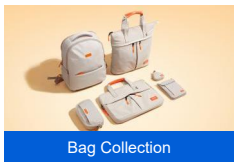

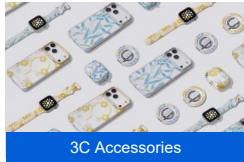

Company Milestones & 4 Core Production Workshops

# Proven Capabilities for Scalable and Reliable Delivery

## 2006-2012

### Start-up global trade

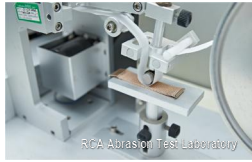

Accumulate large supply chain resources

## 2015-2018

### Set up comprehensive laboratory

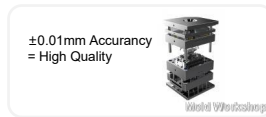

Set up R&D center

## 2012-2015

### Global OEM business

Own factory - Lean production

## 2018-2026

### Advisory project services

Sustainable and environmental development

### **Precision**

Precision mold control up to  $\pm 0.01\text{mm}$

### **Lead Time**

7-15 days mold development cycle

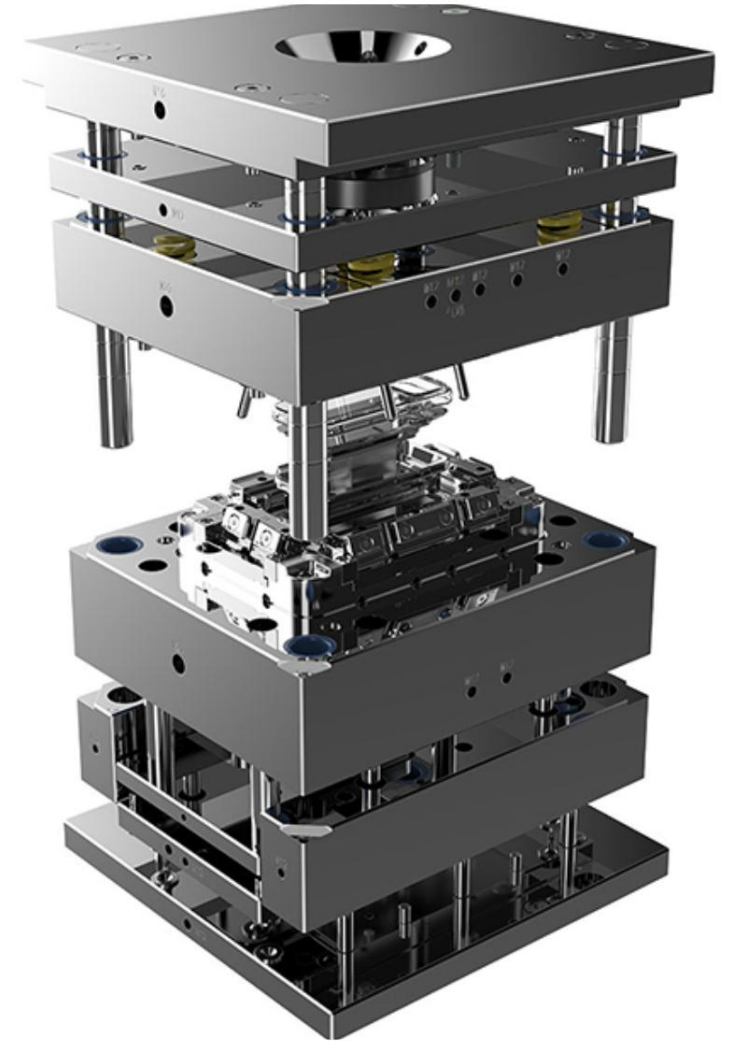

### **Engineering**

10+ years of DFM engineering experience

### **Stability**

Advanced systems with molds up to 500K cycles

## **Molding Design Workshop**

With high-precision molds and fast development capability, we help our customers launch products faster, reduce development risks, and improve market competitiveness.

### Consistency

Defect rate controlled at  $\leq 1-2\%$  with batch consistency across color, structure, and dimensions

### Process Control

80% automated production with robotic handling and reduced manual intervention

### Precision Molding

High-precision molding for thin-wall and complex structures with controlled openings and fit

### **Craftsmanship Capability**

40+ professional machines with stable stitching, refined edge finishing, and controlled handcrafted detailing

### **Material Capability**

Supports leather, PU, and recycled materials with multi-material structures

### **Consistency**

Standardized SOP with multi-step quality control and batch consistency management

## **Sewing Workshop**

With skilled craftsmanship and standardized production processes, we help our customers create premium products, enhance brand value, and achieve better sell-through in retail markets.

## Automated Packaging Workshop

With standardized processes, digitalized control systems, and flexible packaging solutions, C&T ensures every product is safely packed, accurately delivered, and fully compliant with global retail and e-commerce requirements.

### Packaging Capability

Barcode-controlled packaging with automated systems and multi-port shipment across retail, e-commerce, and customized solutions

### Inspection & Quality Control

Final inspection with reporting system, third-party verification, and dedicated inspection rooms

### Protection & Transport Safety

Drop-tested packaging with shock- and pressure-resistant structure

## Drop-proof Structure

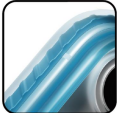

- Microfiber Lining
- TPU shockproof bumper
- Reinforced Corner
- PC

### Corner Protection Solutions

Structural Protection

PET-reinforced Corner

Raised Camera & Screen

Airbag Protection

## Material & Craft System

**Matte texture**  
Anti-fingerprint, scratch-resistant

**Soft-touch coating**  
Skin-friendly, comfortable grip

**Glitter effect**  
Sparkling decoration, eye-catching finish

**Holographic**  
Iridescent effect, color-shifting

**Embossed leather**  
Raised texture, premium feel

## Magsafe Structure

- **Outer Case(PC)**  
Impact Protection
- **Magnetic Ring(N52H)**  
Magnetic Force: 1430 mT  
Precise Magnetic Alignment
- **Frame-integrated Magnetic Positioning System**  
Shock Absorption

### Adaptive Magnetic System

Engineered for Different Use Scenarios

**Daily Use**  
**N48**

**Outdoor Use**  
**N52H**

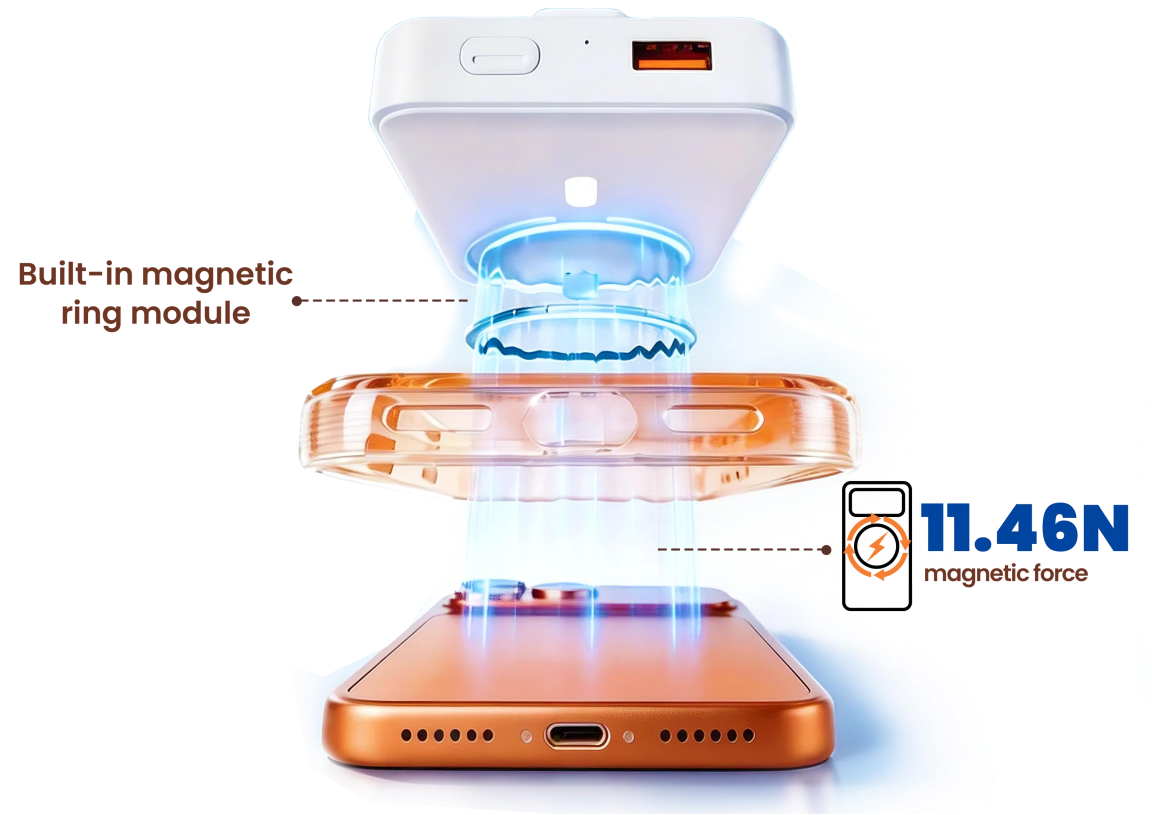

# Proven Capabilities for Scalable and Reliable Delivery

## EarthBack

Ensure compliance and reduce regulatory risk in global markets

Made from GRS-certified recyclable materials, reducing carbon footprint and promoting circular sustainability

## Magnetic Alignment

Ensure stable attachment and reliable user experience

Built-in ring magnet module with up to 11.46N attraction, precisely aligning with magnetic points for stable attachment and fast-charging compatibility

Double-layer IMD  
Scratch & fade resistant

## Scratch-resistant

Maintain product appearance and extend lifecycle

Surface treated with anti-scratch coating; PC/acrylic materials achieve up to 5H hardness, effectively resisting daily scratches and wear

Honeycomb Cushioning

## Impact Protection

Minimize damage risk and after-sales issues

Multi-layer cushioning structure and high-elastic composite materials effectively disperse impact forces, verified by third-party SGS 3-meter drop testing

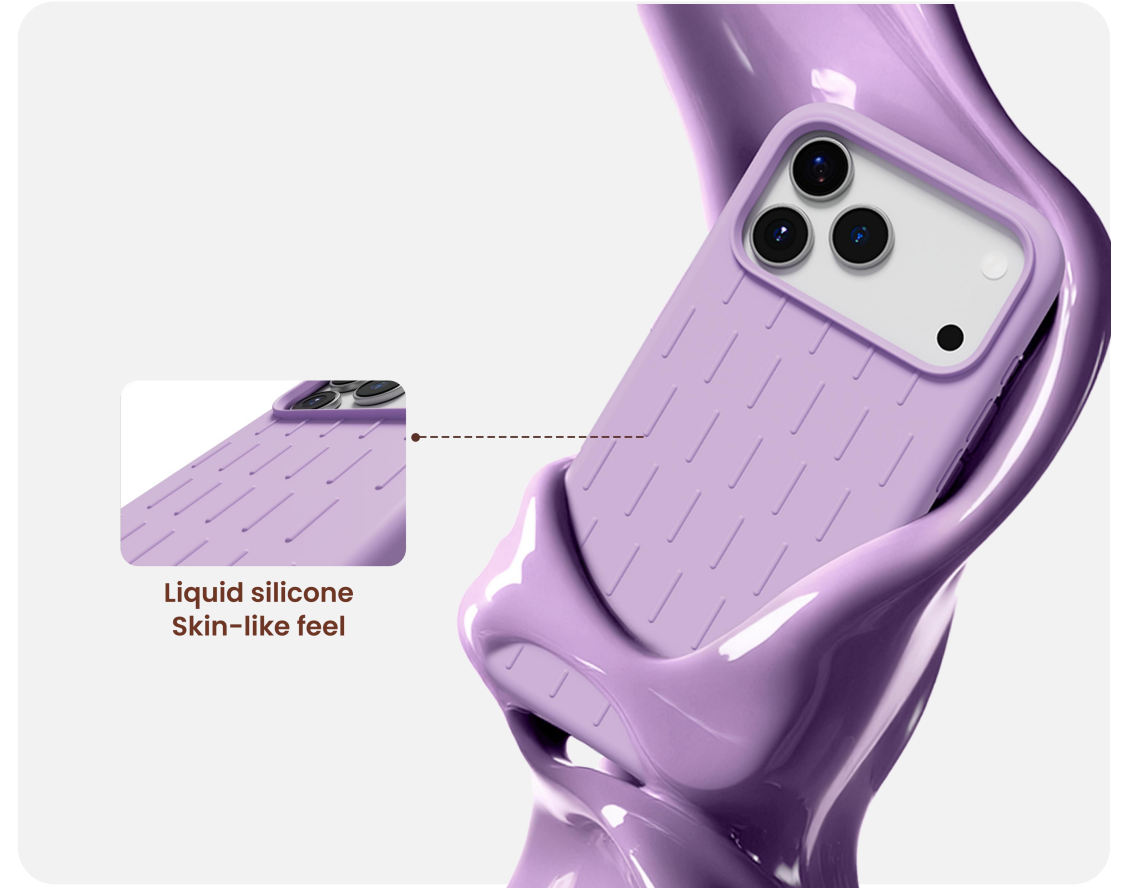

Up to 6 months  
anti-yellowing

## Anti-yellowing

Reduce return rates caused by discoloration

Incorporates UV stabilizers and antioxidants into the materials to neutralize UV light, achieving long-term anti-yellowing performance

Liquid silicone  
Skin-like feel

## SkinFeel

Improve grip stability and reduce accidental drops

Micro-scale matte coating adjusts surface roughness and friction to simulate skin texture, providing a delicate and smooth tactile experience

### On Time Response

Once received your inquiry, we ' ll keep contact timely.

### 6-7 Days

### Sample Time

Depends on style and sample quantity. We ' ll deliver your samples in 5-7days.

### Free Sample

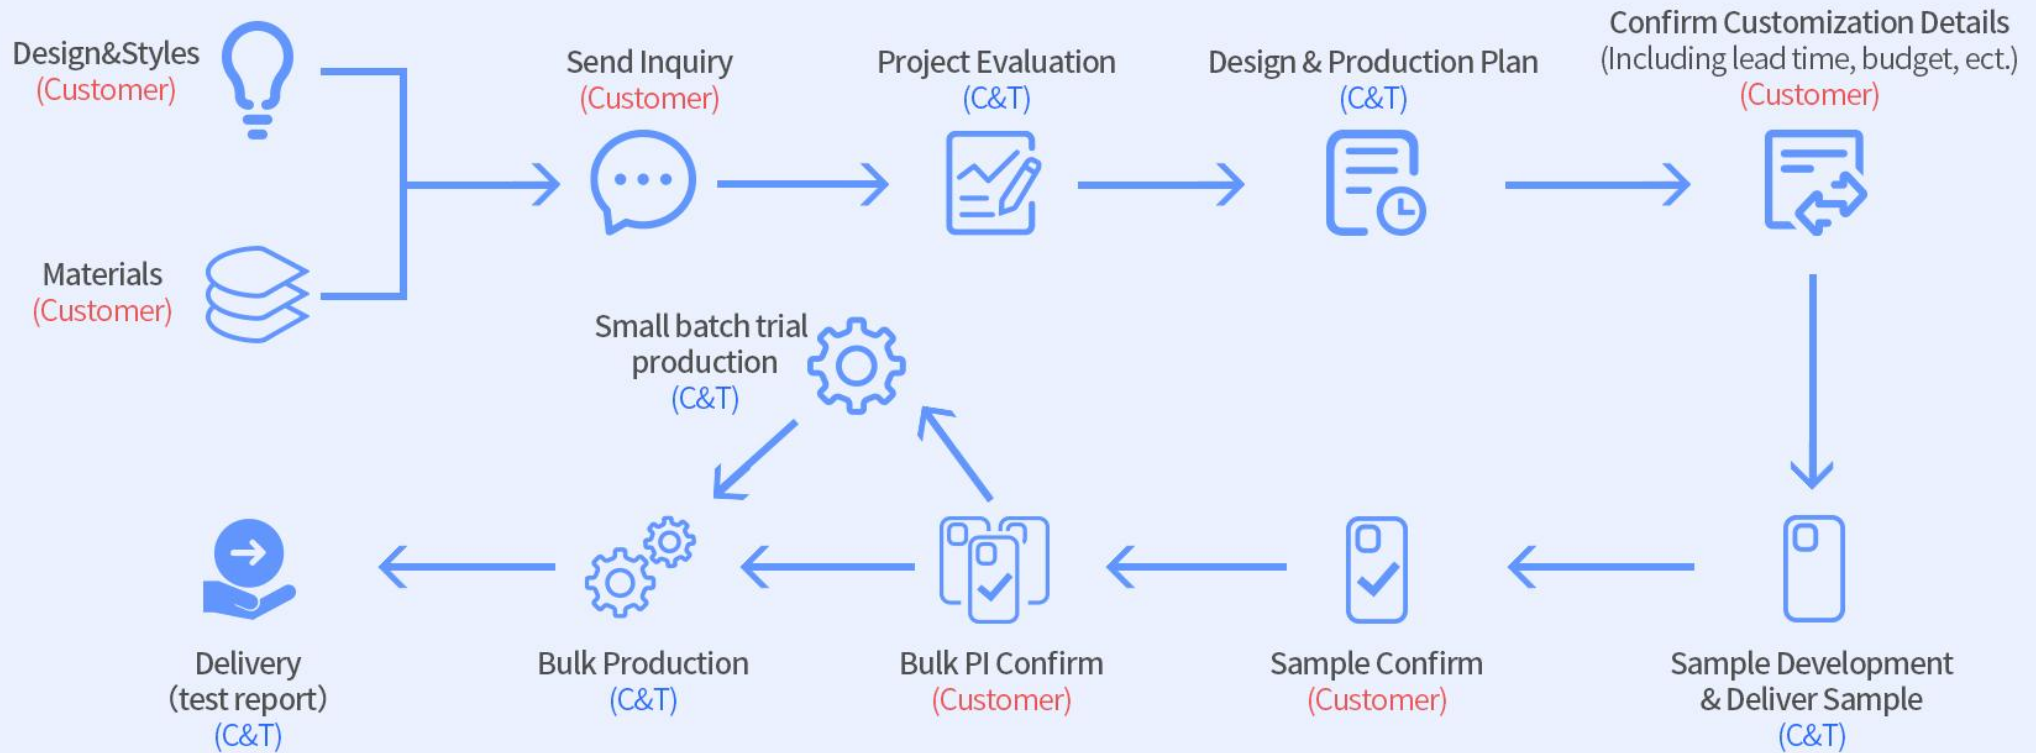

For our customers, all sample is free. Shipping fee excluded.

### Certification

Do not compromise on quality. We can offer TC certification for GRS products.
