iPhone 18 New Phone Case Service Timeline

iPhone 18 Will Reshape the Launch Timeline

Release Timing & Launch Strategy

Starting in 2026, the iPhone lineup is expected to shift from a single fall launch to a dual spring-and-fall release cycle.

— This shift creates multiple, staggered launch windows instead of a single release, requiring more flexible planning for accessories and channel inventory.

The First Foldable iPhone Is Coming Soon

Early foldable iPhone models are available

- The first foldable iPhone may launch alongside the Pro lineup
- Book-style fold with a large inner display and a usable outer screen
- Touch ID may return due to structural and space constraints
- Ultra-thin glass and titanium materials are expected for the display and hinge

Pro Lineup Positioning and Design Changes

iPhone 18 Pro

- iPhone 18 Pro and Pro Max are expected to remain the core models
- Dynamic Island may shrink further or evolve into a punch-hole design
- The Pro Max is rumored to become heavier, with the weight potentially exceeding 240g

Camera and Sensor System Trends

The iPhone 18 Pro lineup is expected to see several major imaging upgrades:

- Variable aperture lenses may improve imaging stability in complex lighting conditions.
- Next-generation stacked sensors are expected to deliver faster response, wider dynamic range, and lower noise.
